To whom it may concern:

Ecotech Marine, LLC is seeking original certification on its new RF module, model number 10169. This radio meets the requirements as detailed in FCC 15.247 (DTS). It also meets the full modular approval as detailed in FCC 15.212, which is covered in more detail in Modular Approval Letter.pdf. The FCC ID number for this device is VKB271829.

Northwest EMC conducted all tests and verification to the required standards at our request.

This product, 10169, will be used on multiple new consumer electronic products that our company manufactures in order to provide wireless connectivity and interaction between our products. A proprietary communication protocol will be used to control the flow of data through this device. The modulation is to Zigbee standard, but the software flow is of a proprietary design.

Please contact me if you have any additional questions. Your attention to this matter is greatly appreciated.

Best regards,

Justin Lawyer
